

# dyson

Range brochure

The vacuum cleaner that doesn't lose suction.

*“2 Tier Radial™ cyclones are the latest development of our patented cyclone technology.*

*By making the cyclones smaller, the centrifugal forces inside are increased. This means we can capture even more microscopic dust in the bin, the very dust which makes others lose suction.”*

*James Dyson*

JAMES DYSON  
Inventor of cyclone vacuum technology

## Dyson engineered and tested

Over 1,000 Dyson engineers and scientists in Britain, Singapore and Malaysia are dedicated to inventing and improving Dyson machines. They are drawn from a broad spectrum of disciplines: Electrical engineering; fluid dynamics; prototyping; electronics; design; testing; separation systems; robotics; software; materials; motors; aerodynamics; microbiology; mechanical engineering; acoustics; compliance; hardware. And others. Every member of the Dyson Research, Design and Development team is an expert in their field. They take great pride in ensuring Dyson machines outperform others and that they're built to last.

The Dyson Airblade™ hand dryer was awarded the Carbon Reduction Label from the Carbon Trust and Planet Ark for the product's life cycle measurement and communication of total greenhouse gas emissions released, along with a commitment to further reduce these emissions in the next two years.  
 The Good Design™ Logo is the independent symbol of good design. It represents that the design has been assessed by an independent panel of Australian and international design experts who recommend that Good Design Australia endorse it as an example of good design.  
 The Design Award™ Logo and the Design Mark™ Logo are independent symbols of design excellence. They represent that the design has been assessed by an independent panel of Australian and international design experts who recommend that Good Design Australia endorse it as an example of design excellence.

## Other vacuum cleaners lose suction

### Bagless vacuum cleaners lose suction.

Although they might look similar to one another, many other bagless vacuum cleaners have inefficient cyclones. They capture less dirt than others so rely on filters to trap it instead. Just like bags, these disposable filters clog during use causing suction to drop.

### Bagged vacuum cleaners can lose suction too.

James Dyson developed vacuum cyclone technology because bagged vacuum cleaners lose suction. When you use them, pores in the bag clog with dust causing suction to drop.

## Dyson cyclone technology doesn't lose suction

### With a Dyson vacuum cleaner there's no loss of suction.

Dyson vacuum cleaners don't have bags and don't rely on filters. Dyson cyclone technology generates forces up to 360,000G to separate even microscopic particles from the airflow. So there's no loss of suction.

# Choosing the right Dyson vacuum cleaner

Here's a few things to consider when choosing a new Dyson vacuum cleaner:

## Type of clean

- For the main clean, choose a barrel or upright vacuum that best suits your house size
- For quick, in-between cleans, a handstick is ideal
- For spot cleans, choose a handheld

## Size of house

- A full size vacuum is best suited to family homes
- For villas or apartments, a medium size vacuum is ideal
- In small studios or one bedroom flats, choose a compact vacuum

## Ease of use

- Ball™ technology turns on the spot without the awkward moves
- Selected Dyson models feature brush bar control at the handle
- All Dyson models excluding Handhelds feature wands for high reach cleaning

## Pet hair removal

- Dyson's triggerhead or motorised models are best for homes with pets
- Selected machines include extra tools to remove stubborn hair from carpets
- Consider the Groom tool accessory for mess-free grooming of your dog

## Type of floor

- Different heads are designed for improved pick-up on different surfaces
- A triggerhead or motorised head provides high pick-up on carpets
- A hard floor tool improves pick-up on hard floors and tiles
- A floor tool with carbon fibre filaments removes fine dust from hard floors

## Allergy sufferers

- All Dyson uprights and barrels are accepted by the National Asthma Council Australia
- Dyson cyclones can capture particles down to 0.5 microns – including pollen mould and bacteria
- Dyson Allergy models have a mattress tool to remove dust mite faeces

# 2 Tier Radial™ cyclones

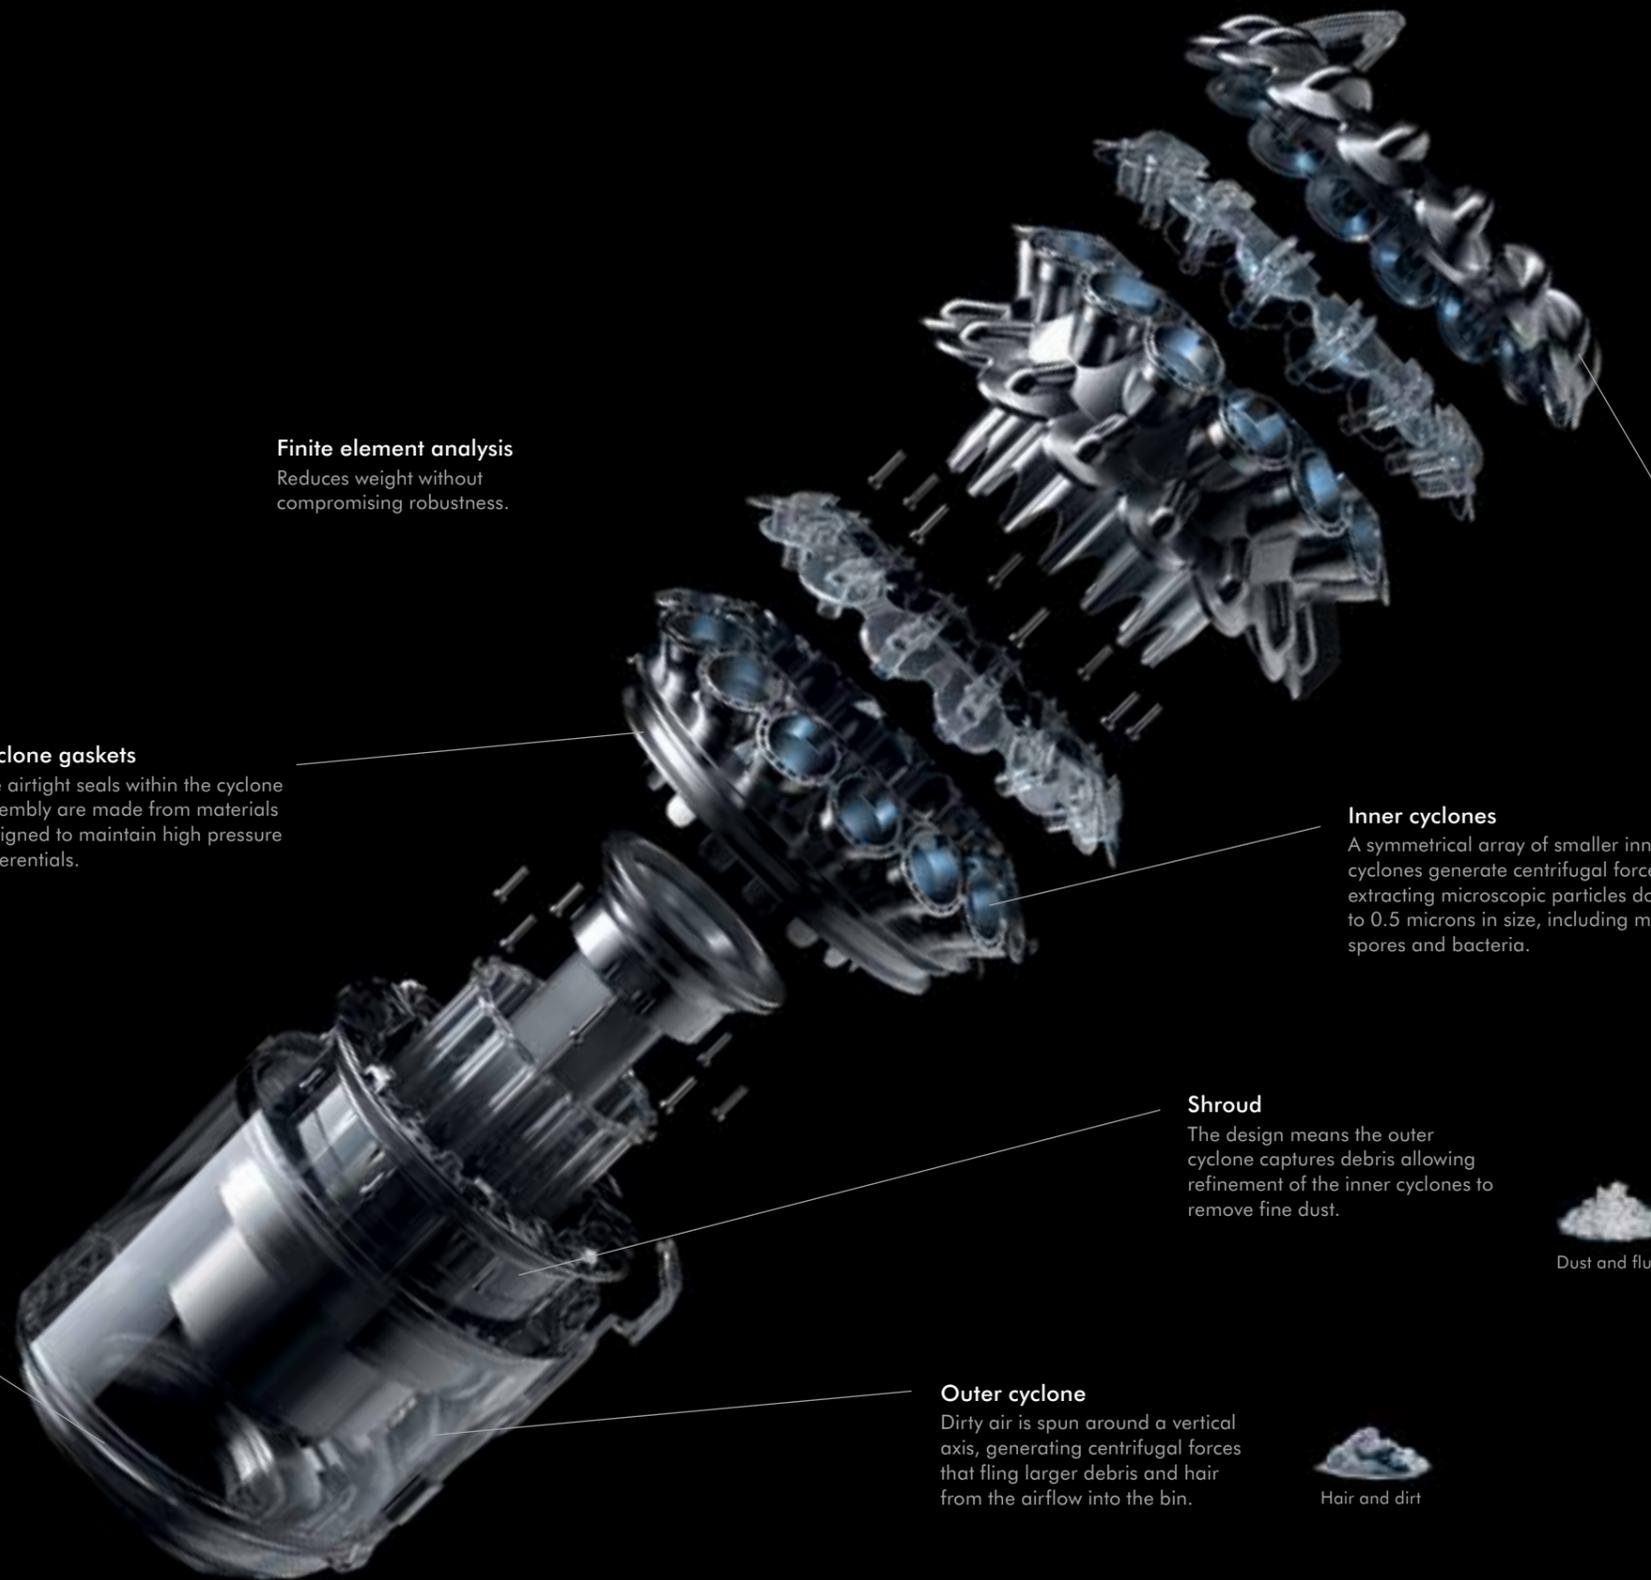

Two tiers of cyclones work in parallel to generate high centrifugal forces to separate more microscopic dust than any other vacuum. Because more dust is extracted from the airflow there's no loss of suction.

**Finite element analysis**  
Reduces weight without compromising robustness.

**Cyclone gaskets**  
The airtight seals within the cyclone assembly are made from materials designed to maintain high pressure differentials.

**Self-inflating seal**  
Maintains pressure difference in cyclone chambers.

**Vortex fingers**  
Guide air from inner cyclones, reducing turbulence and noise.

**Inner cyclones**  
A symmetrical array of smaller inner cyclones generate centrifugal forces, extracting microscopic particles down to 0.5 microns in size, including mould spores and bacteria.

**Shroud**  
The design means the outer cyclone captures debris allowing refinement of the inner cyclones to remove fine dust.

**Outer cyclone**  
Dirty air is spun around a vertical axis, generating centrifugal forces that fling larger debris and hair from the airflow into the bin.

DC47 cyclone technology shown.

**1993**  
**Dual Cyclone™ technology**  
Developed for use in the first vacuum cleaner that doesn't lose suction.

**2001**  
**Radix Cyclone™ technology**  
By replacing one large cyclone with several smaller ones, Dyson engineers were able to increase airflow, therefore creating greater suction power and higher centrifugal forces to capture more dust and dirt.

**2008**  
**Radix Cyclone™ technology + intermediary cyclone**  
Improved cyclone technology that includes an intermediary cyclone (positioned between the outer and inner cyclones) to capture even more microscopic dust as small as 0.5 microns.

**2011**  
**Radial Cyclone™ technology**  
Remodelled airflows maximise suction power. Reconfigured air channels and improved flow efficiency reduce turbulence and preserve air pressure.

**DC  
47**

Two tiers of cyclones capture more microscopic dust.

**2 Tier Radial™ cyclones**

Two tiers of cyclones work in parallel to increase airflow and capture more microscopic dust.

**Additional tools:**

**Combination accessory tool**

Reaches further and has softer bristles for improved spot cleaning and gentle dusting.

**Stair tool**

Removes dirt and dust from corners and against vertical edges of stairs.

**No ongoing costs**

Other machines are still designed to need replacement bags or filters.

Approved by the National Asthma Council Australia.

\*Whole machine HEPA filtration tested according to ASTM F1977.

**Suction release trigger**

Reduces suction so you can clean curtains, upholstery or rugs without them sticking to the cleaner.

**Swivel cuff**

Prevents hose from twisting during use.

**Captures allergens, expels cleaner air**

Dyson cyclones can capture particles down to 0.5 microns – including pollen, mould and bacteria.

**HEPA filtration\***

Ideal for allergy sufferers. Captures microscopic allergens as small as pollen and mould.

**Tough, durable construction**

Made from the strongest materials available to withstand bumps.

**Lightweight adjustable wand**

Adjust to the length you need.

**Detachable handle**

Attach tools directly to the handle or hose to clean awkward places.

**Clear bin**

Made from tough polycarbonate. Lets you see when it needs emptying.

**Hygienic bin emptying**

Just push the button to release the dirt.

**Lightweight robust chassis**

Light to carry and body weight of approximately 4kg.

**Articulating cuff**

Spring-loaded to absorb sudden movement and help follow the user.

**Ball™ technology**

Turns on the spot. The only barrel vacuum cleaner with a central steering mechanism – for greater control.

A Dyson Ball™ vacuum cleans without awkward moves.

**2 Tier Radial™ cyclones**

**Smooth cable rewind**

Cable rewind system has increased torque, so it's faster and less likely to catch on obstacles.

**Low centre of gravity**

The balanced arrangement and low motor position provide a low centre of gravity – maximising stability.

**Axle bearings**

Bearings in the axle reduce friction, enabling the ball to rotate smoothly.

#DC47 Multi Floor model shown.

**DC  
47** multi floor

Cleans every floor type.

**Turbine head with carbon fibre brushes**  
Air-powered turbine spins the brush bar. Anti-static carbon fibre brushes clean hard floors. Rotating nylon brushes remove more dirt from carpets.

**Swivel hard floor tool**  
For high pick-up on hard floors.

**DC  
47** i

Engineered to remove more dirt.

**Dual channel floor tool**  
Two separate airflow channels direct suction evenly – for dirt pick-up across all floor types.

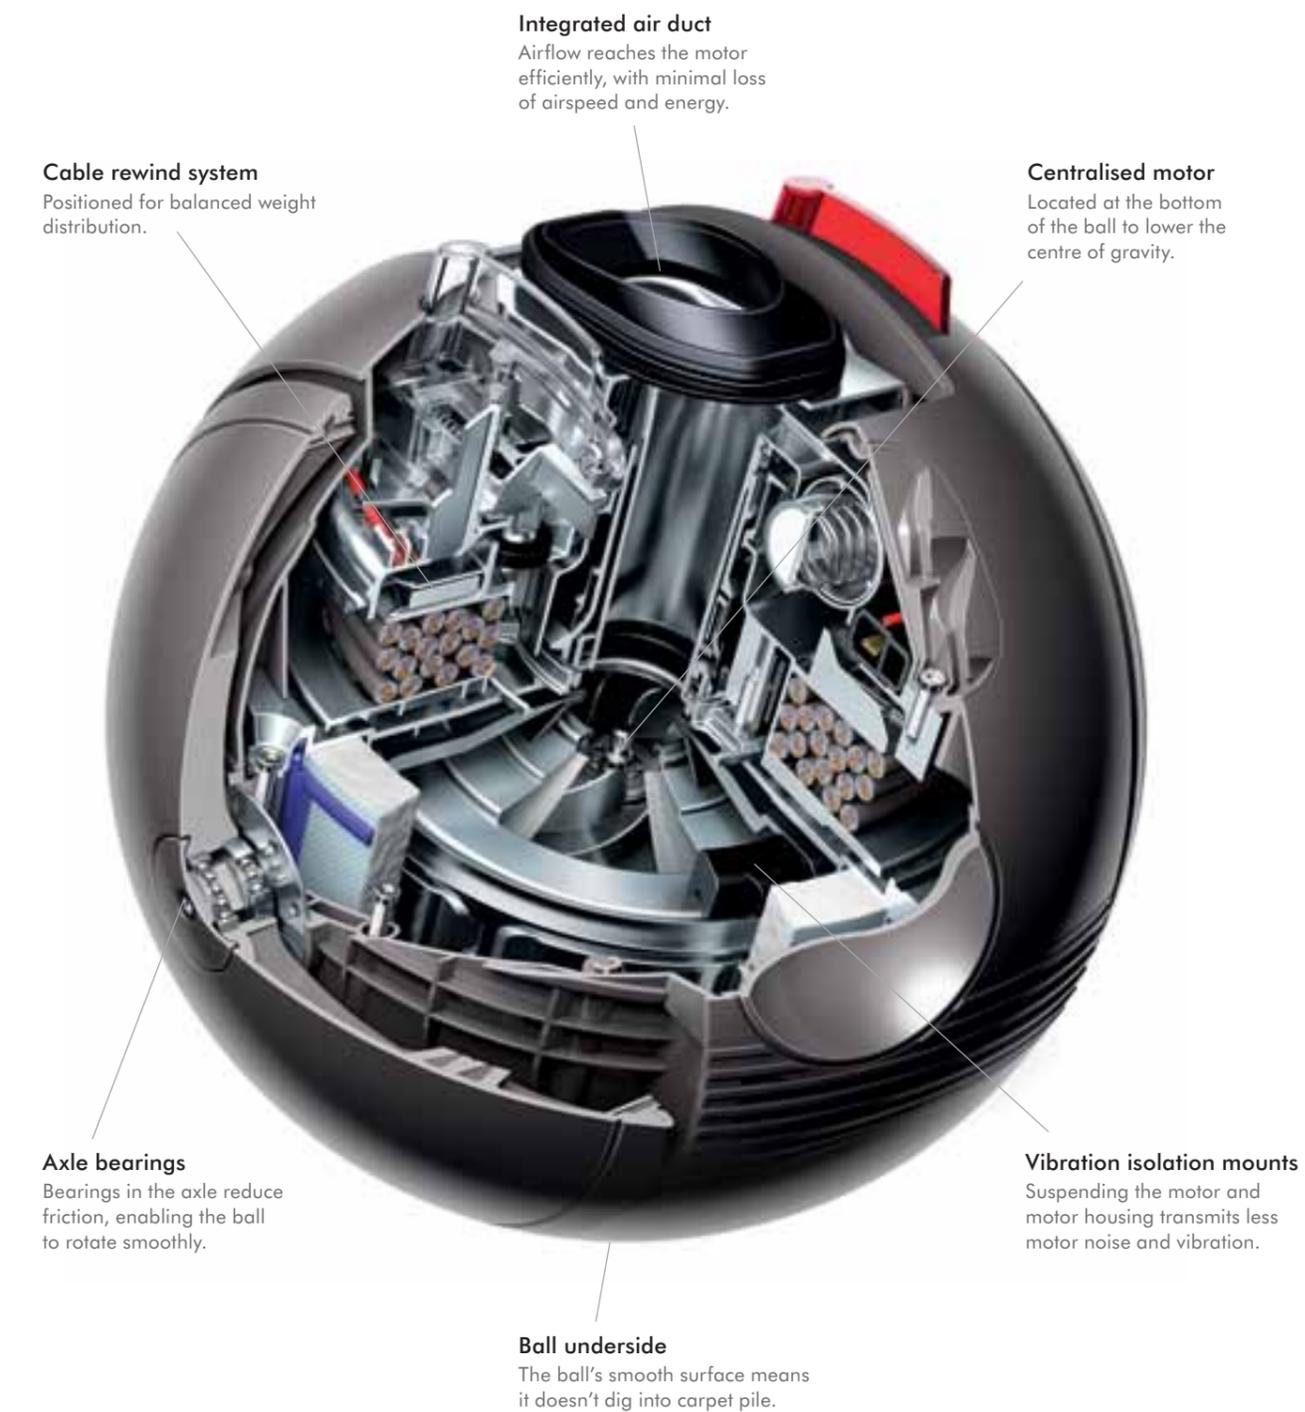

**Swivel hard floor tool**  
For high pick-up on hard floors.

**Stubborn dirt brush**  
Ideal for cleaning mud and dried-in dirt from floors and upholstery.

## Ball engineering

The ball houses many of the major vacuum cleaner components: motor, polycarbonate air ducts and cable. This lowers the centre of gravity, making the machine easy to control.

# dyson ball

No loss of suction.  
No awkward moves.

**Radial Cyclone™ technology**  
Remodelled airflows maximise suction.

**Ball™ technology**  
Turns on the spot. The only barrel vacuum cleaner with a central steering mechanism – for greater control.

**DC  
39**

Engineered to remove more dirt.  
Follows without the awkward moves.

**Captures more dirt than any other cyclone**  
Radial Cyclone™ technology has remodelled airflows to maximise suction.

**Ball™ technology**  
Turns on the spot. The only barrel vacuum cleaner with a central steering mechanism – for greater control.

**No ongoing costs**  
Other machines are still designed to need replacement bags or filters.

Approved by the National Asthma Council Australia.

**Suction release trigger**  
Reduces suction so you can clean curtains, upholstery or rugs without them sticking to the cleaner.

**Tough, durable construction**  
Made from the strongest materials available to withstand bumps.

**Lifetime HEPA filter**  
For allergy sufferers. Captures pollen, bacteria and mould spores.

**Swivel cuff**  
Prevents hose from twisting during use.

**Lightweight adjustable wand**  
Adjust to the length you need.

**Detachable handle**  
Attach tools directly, to clean awkward places.

**Captures allergens, expels cleaner air**  
Dyson cyclones can capture particles down to 0.5 microns – including pollen, mould and bacteria.

**Articulating cyclone pack**  
The cyclone pack articulates with the chassis, so it's easy to control when moving around obstacles.

**Hygienic bin emptying**  
Just push the button, no need to touch the dirt.

**Low centre of gravity**  
The balanced arrangement and low motor position provide a low centre of gravity – maximising stability.

**Flexible cuff**  
Acts as a shock-absorber – re-aligning the machine to keep it on course when pulled.

# Cleaner head technology

## Musclehead™ tool

Self-adjusts across all floor types.  
Low profile for cleaning under furniture.

### Self-adjusts for hard floors

On hard floors, the Musclehead™ tool brushes stay in contact with the floor removing debris from the surface.

### Self-adjusts for carpets

When the head moves across carpet, the pile agitates the surface recognition switch. This lifts the brushes, exposing the carpet to the dual channel edges that remove dirt trapped within the weave.

## Triggerhead tool

The only turbine head activated at the handle. No more bending down.

### Pressure Trigger

Creates a drop in pressure which switches the turbine head on and off. No wires, no electronics.

### Air switch

Activated by a change in air pressure, this switches the brush bar on and off.

# DC 39 multi floor

Cleans every floor type.

### Musclehead™ tool

Self-adjusts to maintain contact with the floor for a quicker clean. Switches easily between carpet and hard floors.

# DC 39 animal

Powerful all-round pet hair removal. High performance on carpets, hard floors and upholstery.

### Triggerhead tool

For high dirt and pet hair pick-up from carpets. Brush bar can be turned off at the handle for delicate rugs and hard floors.

### Swivel hard floor tool

For high pick-up on hard floors.

### Mini turbine head

Ideal for picking up hair from stairs and upholstery.

# DC 26 allergy

Compact. For all floor types.

### Dual channel floor tool

Two separate airflow channels direct suction evenly - for dirt pick-up across all floor types.

### Swivel hard floor tool

180° pivot and debris channel for high pick-up on hard floors.

### Small in size, big on performance.

Ideal for studios and one bedroom flats.

### Radix Cyclone™ technology

Patented Dyson technology that doesn't lose suction as you vacuum.

### Variable suction

Clean curtains, upholstery or rugs without them sticking to the cleaner.

### Convenient tool storage

Combination brush/crevice tool and stair tool store on the wand so they're always on hand.

### Lightweight adjustable wand

Full-size wand adjusts to the length you need.

### Hygienic one-touch bin emptying

Just push the button, no need to touch the dirt.

### Captures allergens, expels cleaner air

Dyson cyclones can capture particles down to 0.5 microns – including pollen, mould and bacteria.

### Lifetime HEPA filter

Ideal for people with asthma and allergies.

Approved by the National Asthma Council Australia.

# DC 29 multi floor

Cleans every floor type.

### Dual mode floor tool

For dirt pick-up on all floor types. Switches easily between carpets and hard floors.

### Swivel cuff

Prevents hose from twisting during use.

### Detachable handle

Click-fit tools directly to the end of the hose for cleaning confined spaces.

### Suction release trigger

Clean curtains, upholstery or rugs without them sticking to the cleaner.

### Convenient tool storage

Combination accessory tool and stair tool store on the wand so they're always on hand.

### Lightweight adjustable wand

Adjusts to the length you need.

### Radix Cyclone™ technology

Patented Dyson technology that doesn't lose suction as you vacuum.

### Captures allergens, expels cleaner air

Dyson cyclones can capture particles down to 0.5 microns – including pollen, mould and bacteria.

### Lifetime HEPA filter

Ideal for people with asthma and allergies.

Approved by the National Asthma Council Australia.

# dyson ball

No loss of suction.  
No awkward moves.

**Radial Cyclone™ technology**  
Remodelled airflows to maximise suction.

**Ball™ technology**  
Turns on the spot with no awkward moves. It's easy to steer along edges and into awkward gaps.

**Self-adjusting cleaner head**  
Brush bar height self-adjusts across all floor types. No fiddly dials or bending down to make adjustments.

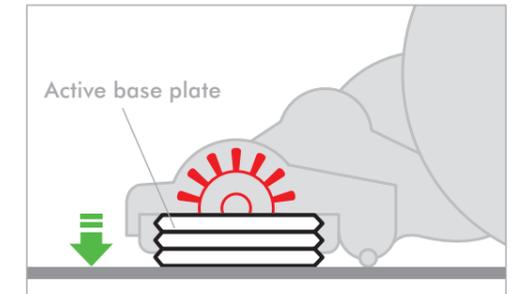

## Self-adjusting cleaner head

Many vacuum cleaners use fixed settings and don't adjust to different floor types – the bigger the gap, the more suction is wasted.

DC40 has an active base plate. It creates the optimal cleaner head contact for every floor type, reducing air leaks and retaining suction.

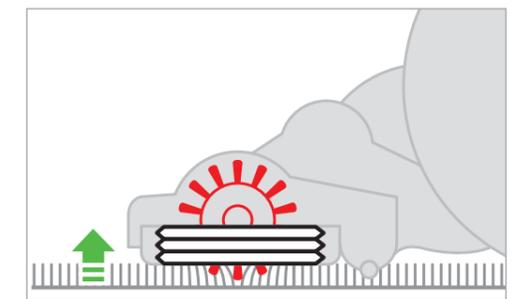

### How it works:

#### On hard floors

The base plate lowers to create an efficient seal. The brush bar lifts clear of the floor to protect delicate surfaces.

#### On carpet

The base plate rises and the brush bar lowers for optimum bristle penetration – removing ground-in dirt and pet hair from different depths of carpet pile.

## Easy to use

#### Turns on the spot

Ball™ technology steers smoothly. Allows easy access to awkward spaces.

#### Durable

Engineered materials are selected for their strength and durability.

#### Instant release wand

Stretches up to 5 times in length for stairs and hard to reach places.

#### Hygienic one-touch bin emptying

Just push the button, no need to touch the dirt.

# DC 40 allergy

Steers into difficult places.  
Ideal for people with asthma and allergies.

**Captures more dirt than any other cyclone**  
Radial Cyclone™ technology has remodelled airflows to maximise suction.

**Self-adjusting cleaner head**  
Optimal cleaner head contact with every floor type, reducing air leaks for more suction.

**Combination floor tool**  
For all floor types. Low reach to clean under beds and sofas.

**Mattress tool**  
Removes dirt and dust mite faeces from mattresses and upholstery.

**Pedal-free automatic recline mechanism**  
Simply recline and go.

Approved by the National Asthma Council Australia.

**Instant release wand**  
Stretches up to 5 times in length for stairs and hard to reach places.

**Fingertip control**  
To instantly turn the motorised brush bar off for delicate rugs and hard floors.

**Hygienic one-touch bin emptying**  
Just push the button, no need to touch the dirt.

**Lightweight and durable construction**  
Engineered materials are selected for their strength and durability. Less weight and bulk.

**On-board tool storage**  
Combination accessory tool and stair tool are stored on the machine so they're always on hand.

**Captures allergens, expels cleaner air**  
Dyson cyclones can capture particles down to 0.5 microns – including pollen, mould and bacteria.

**HEPA filtration\***  
Ideal for allergy sufferers. Captures microscopic allergens as small as pollen and mould.

**Ball™ technology**  
Turns on the spot with no awkward moves. It's easy to steer closer to edges and into awkward gaps.

## Forget conventional cleaning

\* Whole machine HEPA filtration tested according to ASTM F1977.

# dyson digital slim

The cordless vacuum cleaner that doesn't lose suction.

## DC 44 animal

Engineered for tough tasks. Captures hair and ground-in dirt.

### Powered by Dyson digital motor

Up to 3 times faster than conventional motors. The most power-efficient cordless vacuum cleaner.

### No loss of suction

Patented Radix Cyclone™ technology and fade-free battery power for high constant suction.

### Balanced for floor to ceiling cleaning

Centre of gravity located towards the grip for easy handling up top, down below and in-between.

### Double the power

100% more cleaner head power to drive bristles deeper into the carpet with more force.

### Boost mode

Push button to select 8 minutes of high suction for more difficult tasks.

### Increased run time

20 minutes of high constant suction.

Powered by an ENERGY STAR qualified battery charger for a better environment.

### Conventional cleaner heads

The problem with most conventional cleaner heads is that they can leave fine dust on hard floors.

### Dyson motorised head with carbon fibre filaments

Carbon fibre filaments reduce static build up, removing fine dust from hard floors.

### Docking station

Recharges and stores the machine and 2 attachments when not in use.

### Stair and car cleaning

Floor tools and accessories attach directly to the machine.

Dyson digital motor

Radix Cyclone™ technology

### Detachable long-reach wand

Lightweight aluminium wand reaches up top, down below and in-between.

### Cleans under low furniture

Low profile cleaner head. Stays flat to the floor when the machine is fully reclined.

### Pivots for easier steering

Cleaner head pivots 180° without losing contact with the floor.

### V-Ball™ technology

Steers smoothly. No more awkward moves.

### Carbon fibre filaments

Anti-static carbon fibre filaments remove fine dust from hard floors. Stiff nylon bristles remove ground-in dirt from carpets.

### Tough construction

Made from the strongest materials available, selected for their durability and lightweight properties.

### Mini motorised tool with increased power for tough tasks

Removes pet hair and dust from upholstery and confined spaces.

### Combination accessory tool

Nozzle converts to a brush tool for dusting.

### Crevice tool

For cleaning in tight gaps and narrow spaces.

**Trigger controlled**  
Suction power only when it's needed. Preserves battery between tasks.

### Increased capacity nickel manganese cobalt battery

Fade-free power for no loss of suction.

**Hygienic one-touch bin emptying**  
Just push the button, no need to touch the dirt.

**Ergonomic design**  
Fits naturally into the shape of the hand. Centre of gravity located towards the grip for easy handling.

# dyson digital slim

The cordless vacuum cleaner that doesn't lose suction.

**Powered by Dyson digital motor**  
Up to 3 times faster than conventional motors. The most power-efficient cordless vacuum cleaner.

**No loss of suction**  
Patented Radix Cyclone™ technology and fade-free battery power for high constant suction.

**Balanced for floor to ceiling cleaning**  
Centre of gravity located towards the grip for easy handling up top, down below and in-between.

**15 minutes**

**Run time**  
Up to 15 minutes of high constant suction.  
*(13 minutes with motorised floor tool/s attached)*

**Boost mode**  
Push button to select 6 minutes of high suction for more difficult tasks.

**Lithium-ion battery**  
Improved energy density for a longer run time. Releases charge evenly for high constant suction.

Dyson digital motor

**Radix Cyclone™ technology**  
Patented technology that doesn't lose suction as you vacuum.

**Hygienic one-touch bin emptying**  
Just push the button, no need to touch the dirt.

**Detachable long-reach wand**  
Lightweight aluminium wand reaches up top, down below and in-between.

**Docking station**  
Recharges and stores the machine and 2 attachments when not in use.

**Crevice tool**  
For cleaning in tight gaps and narrow spaces.

**Combination accessory tool**  
Nozzle converts to a brush tool for dusting.

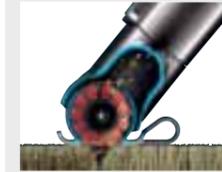

**Pivots for easier steering**  
Cleaner head pivots 180° without losing contact with the floor. No more awkward moves.

## DC 35 animal

**Motorised floor tool with carbon fibre filaments**  
Anti-static carbon fibre filaments clean hard floors. Rotating nylon bristles remove dirt from carpets.

**Mini motorised tool**  
Removes pet hair and dirt from carpets and upholstery in the home and car.

## DC 35

**Motorised floor tool with carbon fibre filaments**  
Anti-static carbon fibre filaments clean hard floors. Rotating nylon bristles remove dirt from carpets.

# The most powerful handheld

### Tough construction

Made from the strongest materials available, selected for their durability and lightweight properties.

### Lightweight and ergonomic

Balanced weight distribution for easy handling.

### LED battery indicator

Indicates battery charge level and diagnostic status.

### Radix Cyclone™ technology

Patented Dyson technology that doesn't lose suction as you vacuum.

### Clear bin

Made from tough polycarbonate. Lets you see when it needs emptying.

**15**  
minutes

### Run time

Up to 15 minutes of high constant suction. (13 minutes with motorised floor tool attached\*).

### Dyson digital motor

More powerful, using less energy than conventional motors. Creates the most power-efficient handheld.

### Hygienic one-touch bin emptying

Just push the button, no need to touch the dirt.

### Boost mode

Push button to select 6 minutes of high suction for more difficult tasks.

### Up to 3 times faster recharging

Lithium-ion battery technology – recharges up to 3 times faster than others.

# DC 34 animal

High performance spot cleaning on carpets and upholstery in the home and car.

### Mini motorised tool

Removes pet hair and dirt from carpets and upholstery in the home and car.

### Crevice tool

For cleaning in tight gaps and narrow spaces.

### Combination accessory tool

Nozzle converts to a brush tool for dusting.

# DC 34

High performance spot cleaning in the home and car.

### Crevice tool

For cleaning in tight gaps and narrow spaces.

### Combination accessory tool

Nozzle converts to a brush tool for dusting.

\*DC34 Animal only.

The only turbine tool that doesn't tangle.

Tangled

When hair wraps around the brush bar of conventional turbine tools, it slows them down or stops them working.

Tangle-free

The Mini tangle-free turbine tool uses counter-rotating heads with brushes to remove hair and dirt – without tangling.

Mini tangle-free turbine tool available from May 2013 as an additional tool in DC39 Animal and as a standalone accessory.

## Accessories

Dyson engineers have developed a range of tools to fit your Dyson vacuum cleaner. There's one for every kind of cleaning task.

**Stubborn dirt brush**  
Ideal for cleaning mud and dried-in dirt from floors and upholstery. Fits all models.

RRP: \$28 Part no. 918507

**Mattress tool**  
Ideal for removing dirt and dust mite faeces from mattresses and upholstery. Fits all models.

RRP: \$38 Part no. 908940

**Up top tool**  
Twists to give multiple angles for cleaning hard to reach surfaces. Fits all models except handhelds.

RRP: \$48 Part no. 917645

**Soft dusting brush**  
Ideal for cleaning blinds and dusting around the home. Fits all models.

RRP: \$38 Part no. 908877

**Flexi crevice tool**  
Extends and flexes into awkward gaps in the home or the car. Fits all models.

RRP: \$48 Part no. 908032

**Groom tool**  
Self cleans. Mess-free vacuum assisted dog grooming. Fits all models except DC01 and cordless models. (If you have a barrel motorhead model please contact Dyson Customer Care).

RRP: \$88 Part no. 921000

**Flat Out™ head**  
Super-low profile for easier cleaning under low furniture. Fits all models except cordless models.

RRP: \$68 Part no. 914606

**Swivel hard floor tool**  
Ideal for pick-up on hard floors. Fits all models except DC01, DC21 Motorhead, DC23 Motorhead and cordless models.

RRP: \$68 Part no. 920018

**Mini tangle-free turbine tool#**  
Ideal for picking up hair from stairs and upholstery. Fits all models from DC19 onwards except DC24 and cordless models.

RRP: \$88 Part no. 925067

**Turbine head**  
For high dirt and pet hair pick-up from carpets. Fits all barrel models except DC02, DC05 Motorhead, DC08, DC19, DC22, DC26, DC38 and DC47.

RRP: \$128 Part no. 911566

**Tool kit**  
Ideal for cleaning the car and around the home. Kit includes: Stubborn dirt brush, Mini soft dusting brush, Mattress tool and Extendable hose reaching up to 1.1m. Fits all cordless models.

RRP: \$98 Part no. 919648

**Car cleaning kit**  
Three tools for a spotless car interior. Kit includes: Flexi crevice tool, Stubborn dirt brush and Mini tangle-free turbine tool#. Fits all models from DC19 onwards except DC24 and cordless models.

RRP: \$138 Part no. 908909

#Available from May 2013 onwards.

Dyson's recommended retail prices correct as at March 2013 but subject to change. Accessory colours may vary from pictures shown.

**All Dyson vacuum cleaners feature:**

- No loss of suction as you vacuum
- Dyson's patented cyclone technology
- Captures allergens, expels cleaner air
- No ongoing costs – lifetime filters
- Suitable for all floor types
- 5 year guarantee (Barrel and Upright models)
- 2 year guarantee (Cordless models)
- 5 days a week Helpline 7000 435 7546
